
Release notes introduction

This document contains release notes for Software Manager Release 5.0, build number: 5.0.0.393.

New or updated features

- With the **Activate with License File** feature you can now activate multiple licenses at once. You can also use compressed files containing multiple license activation files, without the need to unzip the compressed files.
- You can now activate or deactivate a product or entire bundle through the **Activate/Deactivate Licenses via Internet** option in the License Portal. The license information automatically updates in Software Manager.

For details about these features, refer to *Software Manager Help (LIT-12012389)*

All specifications and other information shown were current as of document revision and are subject to change without notice.
